LUCIAN BROOKS
Software Developer

Enthusiastic Self-Taught Web Dev

◆ WORK EXPERIENCE

MamHanoi.com
Built and deployed static restaurant website for client using HTML, CSS, JS.

Waitlist App
After using the Yelp waitlist at one of my favorite local eateries I was inspired to build my own full stack Application. Created with React NodeJS and PostgreSQL.
https://github.com/LucianAiolos/fs-waitlist-react-node.js

Festival Mock Site
Replica of my favorite music festival website in HTML, CSS and JS. One of the first projects I did which sparked my initial intrest in building for the web.
https://lucianaiolos.github.io/Music-Festival-X/

Marketplace App (webiste.name)
A simplified imitation of Craigslist.org Where users can post something for sale. Built using JS and NodeJS and PostgreSQL.
https://github.com/LucianAiolos/MarketPlace

Retro Style PokeDex
Thanks to the Pokemon API and some Vanilla JS I was able to recreate my own version of the PokeDex.
