About

A Front-End Web Developer currently doing freelance work for small businesses. Working with React but happy to learn other languages and frameworks . Excellent interpersonal and communication skills, looking to become part of a team that will help me grow as a developer and as person.

EXPERIENCE

Restaurant Website | mamhanoi.com

- Designed, built, and deployed responsive web app for client using HTML, CSS, JS.
- Implemented DNS routing, SSL as well as SEO.

Towing Business Website | christowing.net

- Designed, built, and deployed responsive web app using React in order to streamline future updates and additions.
- Implemented DNS, SSL and SEO.
- Assisted client with creating Google and Yelp business accounts in order to gain more exposure on the web.

Website Consulting | thejapanesebar.com (bdsmithpics@gmail.com)

- Helped client to determine key page design and style updates for his website and gave guidelines to improve SEO boosting overall incoming traffic by 10%.
- Assisted with client's online store redesign, making a much more attractive and fluid user experience.

Festival Website

- Mock website using VanillaJS
- This was the first project that sparked my interest in Web Development.
- The most challenging part was the CSS but I leanrned a lot about flexbox and the basics of styling websites.

Retro Style PokeDex

- Retro style UI made with HTML and CSS.
- Javascript makes calls to the Pokemon API to retrieve data and pictures to be displayed and displays erros when the search was invalid.
